

broad capability, specialist ability

Projects Marine & Industrial Services (PMIS) W.L.L.

THE TECHNOLOGY OF CORROSION CONTROL

Over the last 25 years corrosion control has seen many dramatic changes. Without a doubt, some of the most significant changes have been in the field of controlled environments and specialised coatings.

PMIS has been in the forefront of these technological breakthroughs with a single-minded commitment to discover new and cost effective ways to extend the life of client's assets.

In all regions, the company's management capability and resources are tailored to provide unique solutions for all corrosion and coatings projects by:

- ▶ Setting the highest standards that apply anywhere in the world for all corrosion challenges.
- ▶ Planning and program control.
- ▶ Protection of assets.
- ▶ Quality standards to ISO 9001-2000.
- ▶ Safety and environmental control.
- ▶ Staying flexible.
- ▶ Customer satisfaction.

Projects Marine & Industrial Services (PMIS) W.L.L. was established in Bahrain in 1984. This division of projects Holding Company is the premier specialist company in the corrosion control and coatings field in the Middle East.

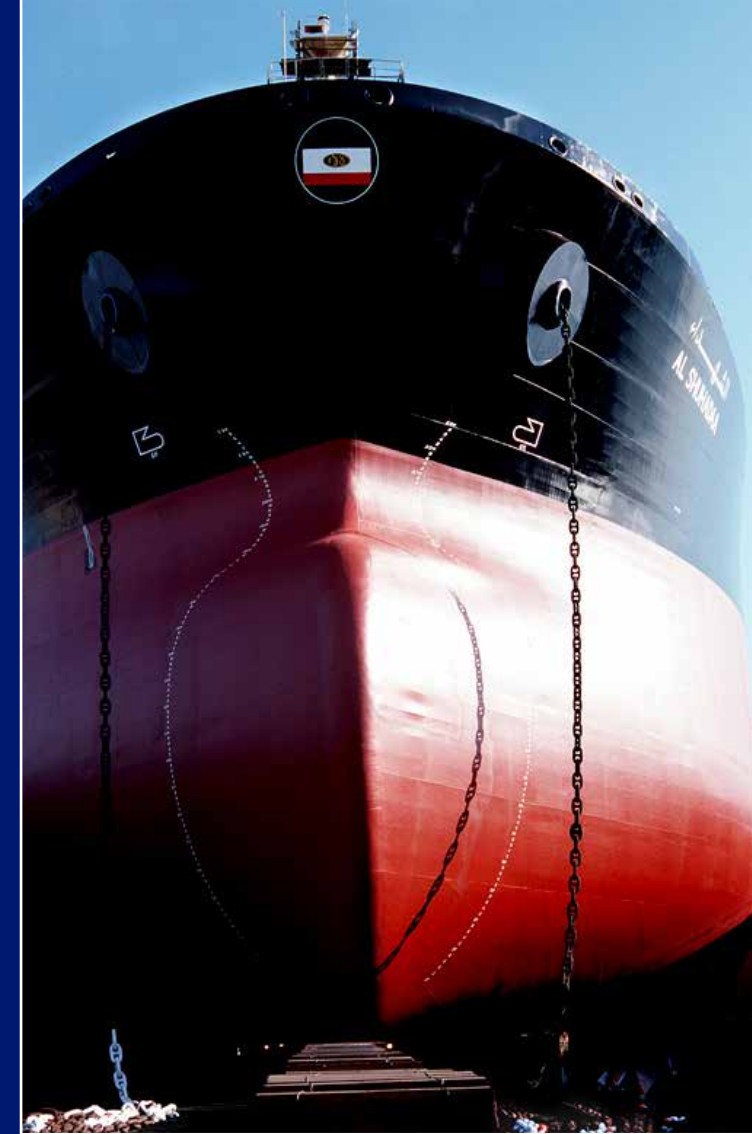

Since its inception, PMIS has had tremendous success in all aspects of grit blasting and painting works, largely attributable to the unique internal tank treatment system, in use within the company.

This system, with the use of PMIS's unique computerised de-humidifiers, ensures that constant temperatures are maintained inside the tanks for prolonged periods, providing a perfect blasted surface for days with no oxidation.

PMIS own a comprehensive list of specialised equipments and with the recent addition of Automatic Blasting Equipments, capable of accommodating Steel Structures up to 1.5 meters wide, Blasting to SA 2½ standard, the Company has positioned itself to undertake any project of any size within the Middle East Gulf States. This is only a part of the many services provided by the company which include any kind of blasting and painting work including structural steel tanks, internal and external, high pressure washing, scaffolding, waterproofing, fireproofing and corrosion control.

PMIS is an approved contractor to carry out surface preparation and coatings (internal and external) for:

- ▶ Arab Shipbuilding & Repair Yard Company (ASRY)
- ▶ The Ministry of Electricity & Water
- ▶ The Bahrain Petroleum Company B.S.C (BAPCO)
- ▶ Aluminium Bahrain B.S.C (ALBA)
- ▶ Gulf Petrochemical Industries Company (GPIC)

▶ Asry Dry Dock Bahrain.

Services

The core business of the company is corrosion control. The company is capable of carrying out work to the highest standard on all types of projects, large or small, in all sectors including services to the oil, gas, petrochemical and construction industries.

PMIS has a unique portfolio of successful projects and continues to build a culture of enterprise and initiative whilst maintaining a reputation for client service and sensitivity to the environment.

The Company is ISO 9001-2000 certified by TUV Rheinland, Germany, for blasting, painting and scaffolding and offers all services to the highest technical standards supported by a fully integrated professional Quality Management System.

More than 400 people are currently employed in a variety of disciplines. Bahrainisation is fully in line with current Government regulations.

Health & Safety in the workplace is most important, with the company's policy to prevent accidents and protect against hazards and dangers following the guidance of the Bahrain Government's Health & Safety Authorities. PMIS operates with an aim of providing and maintaining the safest working conditions at all times.

The Team

The company has a highly skilled and motivated workforce and has in-house and outsourced training schemes, to enable its employees to develop their skills and stay ahead of ever advancing technologies.

PMIS's management team is fully committed and has gained extensive world-wide experience. The team can provide expert advice and consultation to solve clients' needs in any environment.

The team is a hand-picked group of dedicated professionals from around the world, with a wealth of international experience between them in all types of corrosion control/blasting/painting in Bahrain, the Gulf and Europe.

▶ Grit Suction

▶ Tank Prior to Treatment

▶ Tank After Treatment

▶ Coating Ship Deck

▶ Dehumidifier

▶ Automatic Dust Free Blasting Chamber.

Automatic Blasting

With the recent addition of automatic equipment to the vast array of specialized equipment already owned by the Company, PMIS are able to provide dust free blasting services to a standard of SA ½, for section up to 1.5 meter wide. The equipment is completely potable and can be relocated to any site within the Middle East Gulf States.

Services & Equipments

▶ PMIS Heavy Machinery
12 ton forklift

▶ Bridge Deck Water Proofing

▶ Dust Free Track Blasting Equipment

▶ Blast Hoppers.

▶ Grit Recovery Unit.

▶ PMIS Heavy Machinery

▶ High Pressure Washing Machines
